SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT

MEMORANDUM

DATE: March 5, 1984
TO: Combustion Unit Engineers
FROM: Dave Schwein, Supervising Engineer /s/ DES
SUBJECT: Regulation XIII Emission Calculations

Rule 1304 exempts equipment from Rule 1303, providing they meet certain criteria. Rule 1304(a)(2) exempts portable equipment; that is, equipment not used more than 90 days at any one location in the District. Curt Coleman, District Counsel, has decided that the time period, 90 days, is 90 calendar days, and not 90 working days.

Please use this interpretation from now on for all equipment seeking to come under the exemption provision of portable equipment.
